Freight Cars of Every Description

This is a "CRAFTMANS" level resin kit and its construction should not be attempted by anyone who has not built similar types of models. The kit has been designed for those who wish to build a fleet of such cars with a minimum of work.

For this kit, we decided to make the instructions and related material available in PDF form on the RCW website, www.resincarworks.com. This allows us to include car histories, completed model photos, prototype builder's photos, and an ACF General Arrangement drawing. The website instructions also allow much more detailed step explanations, suggestions, and many in-progress kit-building photos. All photos can easily be enlarged on your computer or tablet. These should be very helpful in producing as accurate a model as possible with some meaningful background information.

Please locate and download this material from the RCW website as soon as possible after purchasing this kit. As with all web information, there is no guarantee that it will be available indefinitely.

WARRANTY

All sales are final. There will be no exchanges or returns. Resin Car Works will replace any part(s) found to be defective due to manufacturing or shipping to the original purchaser within the first 30 days after shipment. The damaged part(s) must be sent back with your request for replacement. As these are limited production kits, don't ask for replacement of parts that you damage or lose after the 30-day period.

LIABILITY

Resin Car works will not be responsible or held liable for any and all personal injury and/or health problems, short and/or long term that may result from the use and/or misuse of tools, adhesives, materials, castings, paints or any and all other product(s) used to construct and/or contained in this kit. This kit contains polyurethane castings. Although non-toxic in its cured state, dust is created during filing, sanding and drilling. Air circulation and/or ventilation should be provided. Always work in a well-ventilated room. Wear a dust mask or respirator and safety glasses for protection. Always wash your hands when you're finished working.

Kit #9.02 ACF Type 27 Class 103 **8,000 Gallon Insulated Tank Car** **Mathieson Alkali Works Blt. 1936, 1938**

Thank you for your interest in Resin Car Works and this kit. These ACF insulated tank cars were leased by SHPX to Mathieson Alkali Works, Inc. in 1936 and 1938 to transport Caustic Soda and Liquid Caustic.
