HO SCALE

Freight Car Trucks for the Prototype Modeler

50-Ton Dalman 2 Level Trucks

Many freight cars built in the 1920s were equipped with Dalman trucks. The Dalman 2 Level truck design used additional springs to give a smoother ride. Railroads using this version included C&O, CGW, ITC, L&N, MILW, M-K-T, NC&StL, PM, TC and many Texaco 10,000 gallon tank cars.

All our trucks feature one-piece black acetal plastic moldings with separate brake shoe detail, and non-magnetic, insulated metal RP-25 contour wheelsets from InterMountain Railway Co. Trucks are also available with "semi-scale" (.088" wide) wheels

- TMW-101 50-Ton Dalman 2 Level Trucks,
with RP-25 wheel sets
- TMW-201 50-Ton Dalman 2 Level Trucks,
with "semi-scale" wheel sets

TAHOE MODEL WORKS user sheet for TMW 101/201
